

# Organic Growers!

## Put a Stop to Deer Damage with Messina Wildlife's Deer Stopper®

**Deer repellents don't have to be offensive to be effective! Deer Stopper has a pleasant smell, lasts up to 30 days and protects plants from hungry deer day and night.**

Deer Stopper is an effective, safe and pleasant smelling liquid repellent for use on all flowers, shrubs and fruit trees to prevent browsing and rubbing damage from deer, moose and elk. It is safe and organic so it can be used to protect gardens, orchards, landscaping, tree nurseries and much more.

Deer Stopper is endorsed by the National Home Gardening Club. The Organic Materials Review Institute (OMRI) lists Deer Stopper for use by organic growers on fruits and vegetables.

**How it works** - Deer Stopper repels by both smell and taste, without the strong odor associated with other repellents. It has a fresh and minty odor that dissipates within minutes of application.

**Frequency** - Deer Stopper is applied every 30 days, regardless of weather and watering including heavy rainfall. It dries clear and odor free in about 20 minutes.

**Equipment** - Apply Deer Stopper with any available pump or compression sprayer.

**Preparing Fruits & Vegetables** - Wash fruits and vegetables normally. Deer Stopper does not cause any aftertaste or odor.

**Sizes & Mixing** - available in 2.5 gal., 1 gal. and 1 qt sizes. Mix 1 part concentrate to 9 parts water.
