

35" x 16" Economy Pigeon Trap

A simple clean pigeon trap design. This repeating pigeon trap has four one-way doors with door baffles, a shade screen and a top access door. This 35" x 16" x 8" live capture cage trap holds 12 or more pigeons at a time. Built from 14 ga. galvanized wire with a 1" x 2" mesh this pigeon trap is designed to be economical, durable and portable. The trap comes fully assembled and ready to use.

Item# SW3516S- Economy Pigeon Trap w/Shade Screen

Pre-bait the problem area for several days. Once birds are used to the location, place the trap in the pre-baited area. Pre-bait the trap by tying open the one way doors so birds can move freely in and out of the trap as they eat. Apply bait in a trail that starts outside of the trap, leads in through the doors and ends with the bulk of the bait in the middle of the trap.

After acclimating to the trap, untie the doors and capture the pigeons. Make sure to inspect the trap every day. Remove the pigeons by using the top access door.

The Shade Screen helps create shelter from the elements. Do not leave birds in the trap for long periods of time. Again - inspect the trap at least one time every day.

IMPORTANT NOTE: Having the best trapping equipment does not guarantee trapping success. Bird and animal trapping can be as much art as it is science and you might not catch anything. Effective trapping takes careful planning, a knowledge of the target species, the correct bait, trap location and more.
