

VECTOR FOG™

H200SF Stainless Steel Pulse Jet

The VectorFog H200SF Stainless Steel is designed to apply both water and oil based solutions. The Dual-Point Valve allows you to route oil and water solutions to different points of injection along the fog tube. Oil based solutions are injected closer to the heat source (combustion chamber) while water based solutions are injected at the end of the fog tube where there is less heat and less degradation of the solution. Other features include a rechargeable battery pack, plug-in charger and push-button starting. Low cost makes it attractive to commercial and private owners alike.

Dual-Point inlet allows you to change from oil to water solutions by turning a valve. No extra parts are needed.

- Tank Capacity:** 6.5 Liters / 1.7 US gallons
- Fuel:** Gasoline
- Motor Type:** Argus Tube Pulse Jet
- Solution Types:** Oil and Water
- Flow Rate:** 50 Liters / 13.2 US gallons
- Droplet Size:** 5 - 30 microns
- Dry Weight:** 10.8 kilograms / 24 pounds
- Dims (cm/in):** 40 x 31 x 17 / 55" x 12" x 6.5"
- Features:** Dual water and oil fogging

Simple operation and low cost make the VectorFog H200SF attractive for both commercial and residential applications.
